

With a tough fiberglass reinforced construction.

Note:

Super Jig Saw STS/E and Precision Vice FMS 75 shown here are not included in the delivery.

MICROMOT Tool Clamp

For stationary use of MICROMOT hand-held tools.

Whenever working free hand is difficult or dangerous, here is the solution for the stationary use of MICROMOT hand-held tools. With a tough fiberglass reinforced construction, this tool clamp perfectly fits around the body of our hand-held tools with aluminum-die cast head such as Professional Rotary Tool **IBS/E**, Longneck Angle Grinder **LHW/E**, Belt Sander **BS/E** and Detail Sander **OZI/E** as well as our Jig Saws **STS 12/E** and **STS/E**. The tool clamp is easily clamped via two flaps in a vice (we recommend our Precision Vice FMS 75 or Precision Vice with Clamp FMZ).

NO 28 410
